Virtual Colonoscopy
at Stanford Medicine Imaging

The Stanford Imaging Advantage:

- **State-of-the-Art Technology:** The latest generation 64- and 128-Row CT scanners
- Abdominal radiology subspecialist interpretations
- If polyps are found, Stanford Diagnostic Imaging can coordinate a same day traditional colonoscopy with the Stanford Gastroenterology Clinic

American Cancer Society

The American Cancer Society estimates that 146,970 men and woman will be diagnosed with colorectal cancer and 49,920 will die of the disease in 2009 - this is the 3rd most common cancer diagnosed and the 2nd leading cause of death from cancer in the United States.

In 2008 the American Cancer Society approved virtual colonoscopy as an alternative to traditional colonoscopy.
